1 Refresh source tables
orders, shipments, items
2 Validate input data
Unique keys, valid statuses, dates, no ship date when Pending, etc.
3 Join by id
Classify each line: Complete / Pending / Missing shipment record
4 Evaluate order completeness
Is every corresponding shipment line status Complete?
Yes
No
Close or maintain resolved status
Preserve audit history
5 Update persistent missing tracker
First seen, order age, owner, unshipped value
Past agreed ship-by date?
No
Keep open; no alert yet
Recheck the next day
Yes
6 Notify operations (email / Teams)
Include order, item, and age
Escalate if still open past a higher threshold
